

Naomi, Age 5

Our family first heard of Niemann-Pick Disease when our youngest daughter, Naomi, was diagnosed at the age of two. I remember the feeling of hopelessness when the doctor told us that there was no treatment or cure.

Soon after that day I found a Bible verse that offered me words of encouragement: 1 Cor. 13:7 says: "*Love always protects, always trusts, always hopes and always perseveres*". I clung to those words and knew that because of our love for our daughter, we must not give up; we must persevere.

Niemann-Pick is a devastating disease that offers no hope, the word persevere has replaced that hopelessness and inspired our families to press on despite our obstacles.

and awareness
items to benefit
Niemann-Pick
Disease.**

Niemann Pick Disease is actually a small group of diseases. They all work at a genetic level and most prove fatal at an early age, anywhere from infancy to late teens. There are 3 types of NPD that are most common; type A, B and C. (For more information on the disease itself please go to www.nnpdf.org.)
